BIOGRAPHY

Harold was employed as an engineer in the marine industry from 1989 to 1990 and responsible in undertaking engineering works onboard the vessel. From 1991 until 1996, he joined another engineering firm and was involved in various projects related to the oil and gas industry.

McLarens recruited Harold in 1996. In his current role, he is responsible for managing a team of adjusters, co-ordinating the work assignment, supervising and maintaining service standards.

In his professional career with McLarens, he has undertaken adjustment of machinery breakdown, fire, flood and construction plant and machinery claims in Myanmar, Cambodia and Vietnam.

Harold is also computer literate and had attended various courses such as tanker familiarization course for engineers, basic fire fighting courses, gas/chemical tanker practical courses, and and received a certificate of proficiency in Survivor Craft.

He is fluent in English and Mandarin, as well as spoken dialects.
