Body Injury

EDUCATION / TRAINING

- BSc
- CIRC Licensed Adjuster

BIOGRAPHY

Following his graduation from Shandong Engineering College in 1995 with a degree in electrical engineering, David served in the engineering / equipment department of a local electrical factory for 8 years. During this period, he was responsible for the testing, adjustment and maintenance of equipment in the factory and is therefore very familiar with various types of electrical equipment, particularly equipment relating to the manufacture of semi-conductors.

In 2006, he joined a well-known local adjusting company where he was trained as a non-marine adjuster. In the following two years he dealt with multiple claims of various types and became familiar with insurance policies and the handling of claims of a technical nature.

With his background in electrical equipment, David has strong experience in the handling of MB claims. He also has extensive experience in dealing with fire claims along with associated business interruption losses.

David joined McLarens in June 2008. In March 2010 he was promoted to be Assistant Manager of Non Marine claims at the Suzhou Service Centre, responsible for the handling of non-marine claims and general operations of the team. In 2015, David was promoted to be Manager of the Suzhou Office and is a CIRC Licensed Adjuster.
