BIOGRAPHY

Rodrigo is an Insurance executive working since 1993, always experiencing different sides in the market.

Working as a loss adjuster in the beginning of his career, Rodrigo learned the importance of a systemic analyzation, improving a macro point of view when handling losses and always looking for a solution for his clients.

As an insurance broker, Rodrigo got contacted with problems related to risk management and assessment, while he also faced and managed several relevant files from insurer's perspective.

After that and focusing on his professional development, Rodrigo gained experience at an Insurance Company, working as a Claims Manager and having the opportunity to work in some of the most relevant claims in the Brazilian Market, in addition to intense exposure to the International Market.

Now, backing to the origins, Rodrigo returns to a loss adjustment company, bringing all of his management experience to develop a strong and solid relationship with the entire market, focusing his efforts to put McLarens as a relevant service provider in the Brazilian Insurance Market.
