Marine

McLarens Hong Kong was the first McLarens office in Asia. We have been the leading international adjuster in Hong Kong for more than 30 years. We provide comprehensive claims management services across all major lines of business, including Marine.

Marine losses often come with their own specific and complex challenges, from locating and accessing damaged property to managing the differing interests of the insurer, insured and manufacturer.

We have a long-standing reputation as global marine specialists, stretching right back to our company's inception in 1932.

Our team in Hong Kong is an integral part of this success, having been an important part of the operation here from the beginning.

Our deep knowledge of what goes wrong in transit means we are equipped to deal effectively and efficiently with your loss. From preventative measures to business continuity to recovering third party liabilities, we have the insights to save large amounts of time and money for your business.

An important benefit to our clients, given the international nature of the marine industry, is that they have access to our extensive network of marine surveyors around the world, all adopting consistent survey procedures and reporting protocols.

Our specialist expertise covers:

- Marine Surveys
- Pre-Shipment Surveys
