BIOGRAPHY

Alasdair started his career in 1976 working as an insurance technician for a major international broker with a focus on commercial and construction claims. He then moved into adjusting with UK's largest firm of adjusters in 1979 and worked as an assistant to the Director of Construction based in London. Alasdair handled construction claims for two of the largest building contractors in UK.

In 1986, Alasdair moved to Hong Kong with the same adjusting company to assist in establishing a new office. After 2 years, he was appointed Managing Director and handled major losses both in Hong Kong and throughout the Asia region. In 1997, Alasdair moved to the Philippines to work as Technical Director to assist with the development and growth of that office.

Alasdair joined McLarens Philippines in 2021 as a Technical Consultant.

CONTINUED

ADDITIONAL EXPERTISE

Considerable experience in handling onshore power and energy related claims in the Asia region and in particular the Philippines. Also, for most of his career, he has handled large construction and construction plant and equipment claims both in UK and Asia. This experience includes Delay in Start Up Claims for new projects under construction. Gave the Philippines exposure to typhoons and earthquakes and has regularly overseen the management of catastrophe claims. Also, he has led teams responding to disasters in Guam and the surrounding region.
