ADJUSTER EXPERIENCE

10 years

BIOGRAPHY

Lyman graduated from South China University of Technology Department in 1990 with a bachelors degree in chemical machinery. After graduation, Lyman was employed by a pharmaceutical company where he gained significant experience in equipment importing, equipment maintenance & management, and technical renovation work. Three years later, Lyman joined a local household electrical appliance manufacturer and was involved in developing a new line of tumble dryers, including prototyping and production drawings, contacting suppliers and market research.

In 1997, Lyman joined a local medical supplier. He served as a maintenance engineer and as technical services supervisor (production equipment), technical services supervisor (utilities), and technical service department manager.

In 2007, he joined another local medical supplies company, where he served as a Project Manager. His main work was to improve product quality and compliance with EHS regulations, construction of new factories, and the relocation of the old plant.

Lyman joined McLarens in 2013 as a Loss Adjuster in the Property and Casualty Department.
