

## Storm Babet update

- Following the passage of Storm Babet, all staff at McLarens have been busy assisting policyholders this week, and working hard with our adjacencies to get homes and businesses up and running as swiftly as possible.

- There will be much hard work ahead, although we are as committed as ever to restoring normality for the unfortunate people affected following the widespread damage caused.
- We are delighted to confirm our service levels have not faltered during a week of extremely high intake, and we will continue to drive our market leading service.
