ADJUSTER EXPERIENCE

35 years

BIOGRAPHY

Guillermo has worked extensively throughout South America handling claims. He has worked as an adjuster for over 25 years.

His career as an adjuster began in Argentina working for the local insurance market, but also for the INDER (Reinsurance National Institute). The area where he initially developed his experience was cargo in transit, including marine and aviation.

Later on, given various changes in the insurance market, Guillermo gained additional experience in other areas, involving adjustment of claims and working directly with Reinsurers and brokers.

Throughout his professional career, Guillermo has developed significant experience handling general liability and product recall, cash in transit, jewellery manufacturers, and financial institutions claims.

He is a member of the International Institute of Loss Adjusters and is a registered loss adjuster in Argentina by the Superintendencia de Seguros de la Nacion.
