Science, Economics

BIOGRAPHY

Dave began his adjusting career with a national independent adjusting firm in 1991. He has completed a broad background of educational courses throughout his career involving all types of claims from Liability to Property. While he has spent the majority of his time working as an independent adjuster, he has experience working directly for insurers and understands claims from that perspective.

Dave is now focused primarily on large commercial property losses specializing in the Public Entity, Manufacturing, Builders Risk, and Hospitality fields. He has also participated in various CAT events over the last 10 years including a number of hurricanes, hail events and wildfires.
