### SPECIALTIES

Property  
Builder's Risk  
Commercial Property  
Construction & Engineering  
Energy & Natural Resources  
Heavy Equipment  
Manufacturing  
Oil & Natural Gas  
Private Clients & Estates  
Real Estate  
Renewables  
Retail

### ADDITIONAL EXPERTISE

Risk Services Consulting

### BIOGRAPHY

With over 12 years of experience, Gaby is an electro-mechanical engineer primarily focused on the construction sector. In February 2014, Gaby completed his mechanical engineering degree from Notre Dame University in Lebanon, with a concentration in robotics, and for his final project, he developed a robot capable of moving and following specific logos using image processing. After earning his bachelor's degree in mechanical engineering, he ventured into the construction industry, broadening his skillset in electro-mechanical disciplines while working on major projects in the country at that time, including Waterfront City, Byblos Beach Village, Tower 44, Lebanese University, and Haykal Hospital, collaborating with esteemed international companies such as IMAR SAL and Climtech SAL. Meanwhile, he pursued and obtained my master's degree in project management in 2019, where he studied the practices and behaviors of project management. In 2020, Gaby relocated to Saudi Arabia, further diversifying his contracting experience with additional multimillion-dollar projects such as VOX and Empire Projects. In 2021, he explored a new perspective in the field by joining Systemair Co, where he helped establish the Jeddah branch and analyzed the HVAC market. Lastly, in November 2022, he returned to Lebanon and began my career in loss adjusting with McLarens, utilizing his knowledge and engineering foresight to investigate, analyze, and adjust cases.

### NOTABLE ASSIGNMENTS

- Medical Supplies and Drugs Trading Company, Machinery Breakdown (USD 2.2 Million)
- Carpet and Furniture Supplier, PV (USD 1.5 Million)
- Supply Store/Bread Factory, Fire (USD 0.5 Million)
