Basic proficiency in English and German

BIOGRAPHY

Ignacio is an accomplished electrical engineer with a specialization in power electrical systems, having earned his degree from the ESIME Zacatenco at IPN. He has extensive experience in project management, particularly in electrification, where he has overseen numerous projects from initial assessments to final delivery. His professional background includes roles as a regional electrification coordinator, where he managed projects in collaboration with Luz y Fuerza del Centro.

In addition to his engineering expertise, Ignacio has significant experience in claims management within the energy sector, having worked with various insurance companies. He is proficient in software tools such as Office and AutoCAD and has completed multiple courses in sustainable technologies, including photovoltaic system installation.

NOTABLE ASSIGNMENTS

- Project Manager at Gomez Pedraza S.C | Mexico, developed and reviewed electrification projects for subdivisions and other infrastructures, ensuring compliance with Luz y Fuerza del Centro regulations
- Regional Electrification Coordinator at Homex and Kecasas | Mexico, Led electrification projects from inception to final approval, managing complex procedures with various Luz y Fuerza del Centro divisions, which involved ensuring technical and electrical works.
- Energy Claims Manager at Aseguradora Interacciones | Mexico, Responsible for analyzing and controlling claims related to CFE policies.
