

McLarens Storm Surge Bulletin

Storm Floris Bulletin

As Storm Floris continues to batter regions across the UK, McLarens is fully mobilised and ready to deliver rapid, expert loss adjusting and claims response services.

With wind gusts reaching up to 108 mph, the storm has already caused significant disruption, including widespread power outages and numerous reports of fallen trees and structural damage.

Our experienced adjusting teams are on standby and are closely tracking the storm's progress, with resources positioned to respond swiftly in the hardest-hit areas. We are actively monitoring zones affected by severe winds, surface flooding, and property damage, ensuring a prompt and effective response for our clients.
