

# Waste & Recycling

At McLarens, we've created a customised service specifically designed to meet the distinct challenges and requirements of insurance claims within the Waste & Recycling sector.

The recycling industry provides an essential service that plays a crucial role in sustainability and environmental management. Yet, it is complex and presents numerous operational risks associated with the use of industrial machinery, handling of combustible materials, and the presence of hazardous substances/items.

When considering the complex logistical web associated with the collection, transportation, processing, and refining of these materials, incidents that do occur are often major and significant events. In the dynamic and fast-paced world of waste management, providing a swift, accurate, and environmentally responsible claims handling solution is paramount to minimising the impact of these incidents on businesses.

We provide a customised approach to meet the demands of each claim through our designated Waste & Recycling team comprising CILA-qualified loss adjusters, mechanical engineers, structural engineers, and forensic accountants. The longevity of our service and our close relationships with industry experts, particularly forensic investigators, have enabled us to develop specialist knowledge of the sector.

## Our services include:

Out of hours  
response

Asset  
valuations

Investigations

Coverage  
determination

Loss mitigation

Quantification  
of losses

Damage  
assessments

Dedicated  
London Hub
