### BIOGRAPHY

Chun Wei Goh holds a Bachelor's degree in Mechanical Engineering from Nanyang Technological University. Prior to joining McLaren Singapore, he worked as a Project Engineer at GSK, managing complex mechanical projects including equipment upgrades, vessels, and tank replacements, while ensuring compliance with stringent pharmaceutical industry standards. During his tenure, he gained experience in technical analysis, operational risk assessment, and coordinating multidisciplinary teams, providing a solid foundation for loss evaluation.

Chun Wei has applied his engineering expertise to assess machinery, property, and equipment risks, delivering thorough and practical evaluations. He leverages his technical and investigative skills to support clients in understanding and resolving property and machinery claims efficiently.
