BIOGRAPHY

Prahmarsh Ryan began his career in the medical technology industry, where he was involved in quality assurance and regulatory affairs work for a medical device project in 2024, supporting compliance documentation, verification processes, and regulatory submissions.

He later entered the loss adjusting profession, where he has been involved in the assessment of water damage, fire, machinery breakdown, and third-party liability claims. His responsibilities include conducting detailed site inspections, obtaining and reviewing repair quotations, interviewing relevant parties, analysing policy liability, and preparing factual and without-prejudice reports for insurers.

Prahmarsh has also been engaged in investigations involving burst pipes, construction-related incidents, vehicle impacts, and sewage system blockages, where he assisted in determining the nature and extent of loss, cause of damage, and insured liability. He is experienced in coordinating with contractors, property managers, engineers, and insured parties to ensure accurate documentation and timely resolution of claims.

QUALIFICATIONS

Bachelor's in material engineering
