

## UAE Storm Bulletin - Update 24.03.2026

The UAE is currently experiencing a period of unstable weather, with heavy rain, thunderstorms and strong winds affecting multiple Emirates.

Conditions have intensified in parts of Dubai and the Northern Emirates, leading to surface water on roads, reduced visibility and traffic disruption. Some areas have also seen localised water accumulation and minor flooding.

Authorities have issued weather alerts and are advising residents to exercise caution, especially when travelling. There is also the potential for disruption to flights and public transport as a result of the ongoing weather conditions.

Additional rainfall and occasional thunderstorms are forecast over the next several days as the weather system moves across the UAE with the unsettled conditions expected to last until Friday, 27 March 2026.

## UAE Storm Bulletin - Update 24.03.2026

### McLarens Response

We are continuing to monitor the situation closely and remain ready to support our clients as required.

Our Surge Plan has been activated, with adjusters on standby across Dubai and Abu Dhabi. This enables us to respond quickly and effectively to any instructions.

Given the scale of the weather event, we are well placed to support Insurers and policyholders across all Emirates.

### Outlook

Our team of experienced adjusters remain on standby to assist you and your clients as required. Our team can be contacted on their mobiles or by email out of hours during this time.
