BIOGRAPHY

Tyler is a National General Adjuster with McLarens, specializing in the investigation and resolution of complex, large-loss commercial

property claims, including builders' risk and construction-related losses. Since joining McLarens in 2026, he has focused on

high-severity and catastrophe-driven claims from first notice through resolution, with a focus on detailed causation analysis, multi-layered coverage interpretation, and accurate loss quantification. His work regularly involves coordinating with contractors,

engineers, and consultants to develop defensible damage assessments, as well as analyzing business interruption and delay-related

exposures tied to construction projects.

Prior to McLarens, Tyler served as a Regional General Adjuster with Sedgwick, where he handled a broad portfolio of large and complex property losses. He spent the majority of his career with Intermountain Claims, progressing from General Adjuster to Branch

Manager over an 18-year period, building deep expertise in commercial & residential claims handling, client relationship management, and operational leadership. Earlier in his career, Tyler worked as a Paralegal with Snow Christensen & Martineau, where

he developed a strong foundation in legal processes and litigation support, and as a Marketing Manager with Action Cleaning &

Restoration, gaining valuable insight into property damage mitigation and restoration practices.

With more than two decades of experience across adjusting, legal support, and restoration, Tyler brings a well-rounded and practical

perspective to complex claims. He is recognized for his ability to navigate high-exposure losses, communicate effectively with diverse

stakeholders, and deliver thorough, timely, and defensible claim outcomes.
