Negotiation

BIOGRAPHY

Ciaran Mullane is an Executive Loss Adjuster with over 20 years' experience managing major and complex commercial property claims across Australia and internationally. He brings extensive expertise in commercial property, strata, and catastrophe losses, supported by a strong reputation for delivering practical, commercially focused outcomes on technically challenging assignments.

Having commenced his loss adjusting career in Ireland before relocating to Australia in 2010, Ciaran has developed extensive experience across a diverse range of commercial and industrial sectors. His work spans the full claims lifecycle, including investigation, causation analysis, policy application, quantum assessment, stakeholder management, and claim resolution. He has successfully managed numerous high-value property losses arising from fire, storm, hail, flood, impact, and escape of liquid events, as well as supporting insurers during major catastrophe responses both within Australia and internationally.

Ciaran works closely with insurers, brokers, insureds, contractors, and technical experts to navigate complex claims and deliver clear, well-supported outcomes. He is recognised for his collaborative approach, sound technical judgement, and ability to effectively manage multiple stakeholders while maintaining a strong focus on client service and timely claim resolution.

As an Executive Loss Adjuster, Ciaran provides trusted technical expertise across major property losses and actively supports the development of emerging adjusters through mentoring and knowledge sharing. His commitment to professional excellence is reflected in his ongoing involvement with the Australian Institute of Chartered Loss Adjusters (AICLA) and his dedication to maintaining the highest standards of technical practice.

QUALIFICATIONS

University of Limerick - Bachelor of Insurance & European
Studies
